These trees are not compatible with overhead electric distribution lines. Plant them AT LEAST 25 Feet beyond the lines to allow for crown development and future line reconstruction.

I submit this order of trees through the Benton Soil and Water Conservation District. I understand that planting stock not surviving cannot be replaced by the District and that the District does not guarantee survival. I understand that the above trees ordered cannot be used for ornamental purposes nor can they be resold, given away, or be removed with roots attached. I understand that the trees ordered are for conservation purposes only; such as wildlife, erosion control, windbreaks or shelterbelts. The District reserves the right to substitute stock.

We anticipate the trees to arrive the last week of April or the first week of May. You will receive a notice in the mail with pick-up dates and times.
We tried to maintain the same size tree so you will see an increase in pricing this year due to inflation and shipping increase.
Thank you for understanding.
